

The Cayce/Reilly® School of Massotherapy Presents

3-Day In-Depth Introduction to Oncology Massage

This 3-day introduction to oncology massage will provide you with the basic skills you need to start making smart, safe decisions when working with people who have been affected by cancer treatment.

You will learn about:

- ~ common cancer treatment protocols
- ~ side effects
- ~ and surgical interventions
- ... as they relate to massage therapy.

The class will conclude with an opportunity for you to put your new skills to work as you will provide a supervised full body, one-hour, client-centered oncology massage session with an actual client affected by cancer treatment.

This course will prepare therapists who want to specialize in oncology massage for additional, more comprehensive oncology massage training while also providing a basic level of skill and familiarity necessary for therapists who do not plan to specialize, but simply want to be prepared for those times when clients affected by cancer treatment show up on their tables.
