PRAVED PRAYER HEALING FRIENDS

Dear Prayer Healing Friends,

We are on the second installment from a talk given by Edgar Cayce at the Cayce Hospital on February 1, 1931—Mind as Related to Healing.

We continue on exploring the subject of enabling the “consciousness which produces healing from within.”

In Love and Light,

MIND AS RELATED TO HEALING

Man has been able to gather from nature’s storehouse many things in the form of drugs, mechanical appliances, and the various elements of nature itself, that may aid in healing various diseased conditions. Do that lessens at all the ability of the Individual to gain a consciousness of the divine force from within? Or is it proof of all healing being one? That’s the great question we have to answer.

I am convinced from what the readings have repeated again and again that all healing comes from the divine within. Then what does the mind have to do with healing?

It has to be awakened, either by something without or by something within, to that consciousness where the divine may heal. There has to be brought to the individual a consciousness that the healing is from within, not from without. Just as we have said about the kingdom of heaven—it isn’t that we go out to find who will come and tell us, but it is rather within our own selves.

If an individual is able to be awakened sufficiently from within, all the medicines, all the appliances, and all the treatments in the world would mean nothing. The Great Physician Himself is ever ready and willing that we should have that, which is our true heritage, if we will but open ourselves to that heritage.

But—if we are so earthily minded, if we have so turned our mental vision on something without or by something, even that heritage would mean nothing. Those who turn our vision on something without or by something will fail to gain the consciousness which produces healing from within. It must be awakened, either by something without or by something within, to that consciousness where the divine may heal.

As Help is Received, Remember to Thank God, the Giver of All Good and Perfect Gifts.

The Edgar Cayce readings emphasize the importance that those who are seeking help and healing through prayer actively participate in the prayer effort—for praying for themselves and others on the list—creating a cooperative prayer effort. In the giving comes the receiving.

Cont. from page 1

we are awakened by one of those things in God’s own storehouse, which He has allowed men to gather and put in such shape as to assist in awakening what is necessary for the healing to come.

Two weeks ago I received a request from a man for information concerning his physical condition. I will read you just a portion of his reading, so that you may see if it is in keeping with what we have just discussed.

Yes. Now, we find there are conditions that are a hindrance in the physical body, affecting directly the sensory organism, especially as related to the eyes.

“In meeting these conditions, it must be known that all healing, all resuscitating forces of a body, must come from the divine within. . . for such a consciousness of within that will make for constructive forces, doing away with passiveness even in the physical by holding to the divine. These conditions, however, as we find, may be aided by the use of external forces; for all force, all power, emanates from one source.

Yes, now, we find there are conditions that are a hindrance in the physical body, affecting directly the sensory organism, especially as related to the eyes.

In giving assistance, much might be said respecting the conditions that brought about this condition of destructive building, as to the life, thought, experience, in the entity's program; much might be said also as to what is necessary for the entity to gain insight into the spiritual life, and the difference between constructive thought and destructive thought.

In meeting these conditions, it must be known that all healing, all resurrecting forces of a body, must come from the divine within...for such a consciousness from within that will make for constructive forces, doing away with passiveness even in the physical by holding to the divine. These conditions, however, as we find, may be aided by the use of external forces; for all force, all power, emanates from one source.
